Tools & Practices: OAuth2.0, JWT, Git, Netlify, Vercel, Heroku, AWS Lambda, Firebase, REST APIs, Jest, Cucumber, TDD, CI/CD Basics

Other: Accessibility, SEO, Documentation, OOP & Functional Programming

LANGUAGES

• **French** (Native)

• **English** (Fluent)

• **German** (B1-B2)

EDUCATION

FULL-STACK WEB DEVELOPMENT COURSE AND PYTHON SPECIALIZATION,
CAREER FOUNDRY | REMOTE
May 2025 – February 2026
• Project-based training in React, Node.js, Angular, React Native, Python, Django, databases, and TDD
• Built multiple full-stack applications using modern development workflows

PROJECTS

Recipe Application | Full-Stack Project (Django**)**
• Designed and developed a multi-user Django application with authentication and role-based access, securing user-specific data
• Implemented complex model relationships and business logic to improve data integrity
• Built data-driven features including statistics, trends, and visualizations to provide users with actionable insights
Github | Hosted Version

Movie Web Application | Full-Stack Project
• Built full-stack movie application with REST API and authentication, enabling personalized user accounts and experiences
• Designed backend endpoints for search, filtering, favorites, and profile management to enable efficient content discovery
• Developed responsive UI using reusable components and JWT-based authentication to ensure maintainability and secure access
Github React Frontend | Github Angular Frontend | Github Backend | Live app

Chat Application | Mobile App
• Built real-time chat app using Firebase Authentication and Firestore to support low-latency messaging
• Implemented image and location sharing, offline message access via AsyncStorage, and an accessible iOS/Android UI, improving usability across devices with or without network access
Github | Live Demo

Serverless PWA | Full-Stack Project
• Developed installable PWA with offline support using a TDD approach, increasing reliability
• Implemented a serverless backend using AWS Lambda and Google Calendar API, enabling real-time event filtering and improving performance and scalability while reducing operational overhead
Github | Hosted Version

WORK EXPERIENCE

HEAD OF TECHNICAL SUPPORT, WEBAGENTUR.CH | REMOTE
January 2013 – March 2025
• Led technical support for 100+ CMS-based client websites, resolving complex issues and improving overall uptime and platform reliability

- Customized and debugged HTML/CSS templates and collaborated closely with developers to reproduce, analyze, and fix production bugs
- Optimized SEO and website performance for a primarily French-speaking client base, improving visibility and load times
- Designed and delivered CMS training for non-technical clients and new hires, reducing recurring support requests and increasing user autonomy

ACTIVITIES

Music, author and researcher on Belgian beer culture, community events, travel, continuous learning
